

SUSTAINABILITY

With thoughtful design and intentional partnerships, we take pride in making conscious choices and treading as lightly as possible on our local environment. Taking inspiration from the surrounding locale, Alila Marea seamlessly blends into the bluffs with natural materials and native plants in an innovative expression of eco-design with a sustainable focus. The resort has been recognized as one of AFAR Magazine's "Best New Sustainable Hotels" and plans to achieve Earth Check Silver Level Status by the end of 2023.

Building Features and Materials

- Power over Ethernet throughout the resort
- Solar pre-heating of all water and pools
- Water conscious guestroom fixtures
- Motion sensor LED lighting throughout the resort
- Occupancy sensors in guestrooms for lights and HVAC
- Hard floor surfaces through the resort with low maintenance
- Concrete walls for design element and temperature retention
- 100-year-old reclaimed wood sculpture used for Front Desk

Local Environment

- 50,000 cubic yards of sand replenishment to South Ponto Beach during build phase
