

ALILA EXPERIENCE

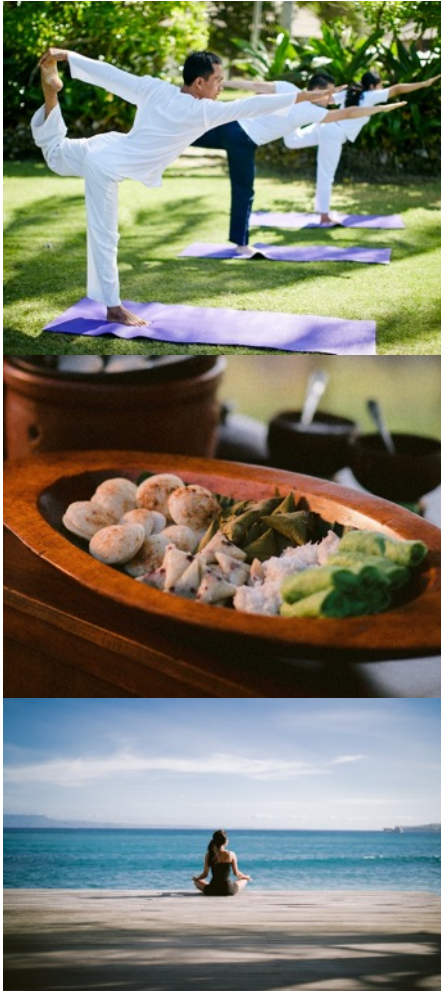

Real, original, traditional! These three words are becoming synonymous with East Bali. The simplicity of the folk around, the relatively un-spoilt and age-old traditions, the smiling faces, the swaying palms, and narrow streets with paddy and volcanoes as backdrops, East Bali and Alila Manggis are Surprisingly Different.

Traveling to a new place is a journey to learn about that place, the people, the culture, the food, and some of the more down-to-earth ways they may live. It is said, “Experiences provide happy memories that outlive those material things and possessions; it is indeed the key to emotional wellbeing” – a philosophy that Alila creates. Keeping this in mind, we have compiled some experiences and journeys, packed with the option to laze around or indulge in different activities that would take you from ancient palaces to cycling down a volcano to driving through streets surrounded by paddy fields and local people, to learning how to fish and cook like the Balinese. Some engaging dining experiences at Seasalt Restaurant or our Organic garden nearby are also available.

East Bali and the area around us have many more secrets you may want to unravel during your stay with us. Budi and Murdika are two interesting local personalities who make up our Leisure Concierge team and are on hand to introduce you to these secrets and experiences that are genuinely ‘Surprisingly Different.’

“Selamat Bersenang-Senang” or “Enjoy the Experience”

AMED | LIPAH BAY | JAPANESE WRECK - EXPERIENCED DIVERS | BUNUTAN | Two dives

There are many dive sites in the area with good coral and diverse fish life. Most of the diving is done out of local boats, however some sites are available by shore, like the Japanese WWII patrol boat, and best variety of hard corals in Bali, just 10m off the shore.

MANTA POINT - NUSA PENIDA | Two dives

Located at the far south side of Nusa Penida, Mantas can be seen cruising in formation of 2 to 7 in very shallow seas at some 10 meters. Crystal bay on other hand, beneath its crystal-clear water hides shallow coral gardens with a lurking very deep drop off.
